

The go-to provider for emergency and ambulance medical services in the region

RPM has taken a leading role in remote healthcare management, contributing to better pre-hospital care in medical emergencies.

One of our principal clients
Abu Dhabi Airport

Our experienced and highly-trained medical professionals have the back-up of one of the largest private fleets of ambulances in Abu Dhabi.

All our vehicles are available from strategically-located ambulance stations on a 24-hour basis. They are equipped for acute emergencies, from initial evaluation to resuscitation, treatment, investigation, stabilisation and monitoring. In addition, each ambulance carries a range of emergency drugs that are customised to clients' needs.

In Dubai, we offer non-emergency ambulance transfers, pre-hospital care services, medical coverage at a range of events, and on-site ambulance and medical assistance.

We start from the basic principles of first aid, which are to:

- **Preserve** life
- **Prevent** further injury
- **Promote** recovery

RPM has taken a leading role in remote healthcare management, contributing to better pre-hospital care in medical emergencies. This, in turn, is reducing the burden on hospitals and the extra healthcare costs they incur when dealing with emergencies.

358

Average number of annual emergency and non-emergency ambulance journeys.
