

A trusted and reliable healthcare partner for on-site work forces throughout the Middle East

RPM is a key unit of one of the largest healthcare groups in the region. This enables us to provide comprehensive patient management services to internationally-recognised standards.

Further, we strive to leverage and constantly build the reputation that VPS Healthcare upholds for excellence in healthcare delivery across the region.

It is against this backdrop that we are increasingly recognised as a trusted and reliable healthcare partner for the oil and gas industry, construction companies and chemical facilities. In fact, we are the first go-to partner for any industry with a need for on-site healthcare or emergency transfers from remote sites.

Since our inception in 2010, we have quickly grown and now operate out of strategic locations in Abu Dhabi, Dubai and the Northern Emirates. Our portfolio of services has also expanded and we are now one of the region's leading medical staffing organisations. We are a major provider of medical support at sporting and entertainment events, where we coordinate specialised medical and ambulance services. We also operate one of the largest private fleets of ambulances in Abu Dhabi.

We are particularly proud of our role in supporting on-site workforces with customised health check-ups, along with training in the use of protective clothing, maintaining a healthy lifestyle, and wider health education and awareness campaigns.

By enabling 24/7 access to state-of-the-art healthcare solutions, we ensure workforces in multi-cultural companies that drive one of the world's most developed economies can operate effectively. This demonstrates our focus of being a vital cog in UAE's economy.

Dr Shamsheer Vayalil

Chairman and Managing Director

We ensure workforces in multi-cultural companies that drive one of the world's most developed economies can operate effectively. This demonstrates our focus of being a vital cog in UAE's economy.
